

4G – Wi-Fi Dongle Setup Instructions

Inside the box you will find the mobile Wi-Fi device, battery and USB cable.

Take the back off the device. Find the notch in the case and pull the back off from there.

Inside take note of the label information. You will need to know the **SSID** and **Wi-Fi Key** to use the device.

Insert the battery matching the gold pins together.

Replace the back cover, lining up the notch on the case to the device.

Plug the USB cable in to the USB port on the device and the other end in to the laptop

Once charged the device can be removed from the laptop and placed in a convenient position to maximize 4G signal strength.

Turn the device on using the power button on the side.

Lights will indicate 4G signal and power status
