

Year 10 GCSE Timbers Summer Homework

Complete at least three design ideas in full detail with colour and annotations. A successful design page will include the following

- Each design need to be neatly drawn in a suitable 3D format, such as isometric.
- Apply gradient shading in colour to emphasize the shape, size and materials of the product.
- Each design may have more than one drawing so show any additional details.
- Each design needs annotating to explain its function, material choice and safety aspects.

For the annotations use the ACCESS FM method that you followed when completing your product analysis.

Below is a WAGOLL of a design idea page along with a list of what makes it a successful design page. Use this as a quality guide when completing your own design.

- A variety of imaginative ideas.
- Annotations explaining each design.
- Drawn in isometric.
- Colour on most designs.
- Designed using specification.
- Designs numbered.
